

Firewall settings for SIP Trunk

Firewall settings

If the PBX is located behind NAT and it doesn't support Outbound (RFC 5626) and nor can't be configured to use the external IP of the PBX in the Contact header, enabling SIP-ALG might be necessary. In all other cases, SIP-ALG must be **disabled**.

Incoming

The following incoming traffic must be allowed:

From	Port	Protocol	Service
94.127.49.224/28	5060-5061	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	49152-65535	UDP	RTP/RTCP

Outgoing

The following outgoing traffic must be allowed:

To	Port	Protocol	Service
94.127.49.224/28	5060-5061	TCP/UDP	SIP/SIP TLS
94.127.49.224/28	49152-65535	UDP	SIP/RTCP
